RELEASE 4.2

News in this release

Illustrations in web viewer

Illustrations can be added to the structure of a catalogue. A thumbnail will be visible in the web viewer and user can choose to view the full image.

Content sets

It is now possible to distribute downloadable files, e.g. software downloads or cad drawings, using the web viewer.

To support his, Content set, a new presentation type, is added.

- Handling Content set as a repository in the Manager.
- Importing Content sets as xml using Signifikant Simplified XML.
- Viewing Content sets in the Web Viewer.

Search

Search can now be configured to search in current catalogue or in full database.

Part list can be filtered in part assemblies to make it easier to find parts when having long part lists.

▼ Search in OS 600 Search in all Part 5 / 11 (view all) Point 80 mm Point 50mm Description Points Number 155027 Description Points Number 155028 Tip 210mm Description Points Number 172326 112000 Θ Θ \leftrightarrow Engine installation 🛓 🖉 Part assembly > Used in 95 Number Remark Quantity Name Points 955342 Bolt Test 955903 Washe 955386 Bolt 955366 Bolt 955346 Bolt 2 955343 Bolt

Priority on bulletins

It is now possible to set a priority on bulletins, 1 to 3. Depending on priority a different icon may be used to indicate the priority of the bulletin.

Full catalogue pdf

S

It is now possible to download a pdf for the entire product on the product page of the web viewer.

Pdf report template may be configured*.

Better on mobile

My account and My orders are now adjusted to fit better on smart phone screens.

Different logo can be used depending on media.

Avatar name is shortened on smart phone screens.

Filter engine update

Filter engine* can now handle filters specific to catalogues and filters on part rows.

* Filter engine is an add on module.

Service level on part rows

Manager now supports adding specifications for service level.

The service level will be displayed on the part row of a part assembly.

General view 🛓 🖉

3 Parts without ordering number are not delivered separately for technical reasons. The use of other than genuine Desoutter replacement parts may result in decreased tool performance and increased maintenance and may, at the company option, invalidate all warranties.

> Used in

Google tags

Signifikant Web Viewer now has tags to allow Google to crawl catalogues and parts.* Example of usage is to allow Google to crawl product name

and number.

* Configuring Google search requires configuration, which may be an add on service.

XLIFF text translation support

Manager now support the XLIFF format for translations. Text repository can now be used to export and import texts based on XLIFF. Also, texts can be imported in the import repository.

Delete and remove unused data

Manager now allows to delete information that is in use. The function will remove the information from all the places where it is used.

Manager will also allow to delete all unused information in a repository.

More things...

- Order row information is now also shown under MyOrders, not only in Admin.
- It is possible to configure web to show or hide toolbar, header and footer.
- It is possible to place permissions on replacements function so that only selected users get access to this information.
- Home button can point to external site, any URL.
- Custom menus can be placed in toolbar.
- Status monitoring now possible by calling a URL.
